| 14. What facilities and services do you think are most important to communities around the National Park? | It is very important to ensure that communities in rural areas have adequate access to local services and facilities. By ensuring adequate local provision, residents will have a better quality of life and will need to travel less thus reducing their impact on the environment. Therefore the safeguarding of facilities such as post offices, pubs, shops, schools and public transport provision must be inherent in Local Development Framework policies. Transport and ICT provision are also key to delivering improved accessibility, connectivity and sustainability and also play a vital role in diversification and the modernizing rural delivery programme. |
