

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
David Shepherdson	Ruston	To fence off the Ruston Cowpasture, SSSI woodland to prevent livestock from accessing Ruston beck and adjoining woodland on steep bankside. To protect trees and stop soil erosion and sediment ending up in water course.	£4,995.00	£4,995.00	16/09/21	31/12/21
Mark Hutchinson	West Ayton	Purchase of a direct drill that allows for companion cropping to enable the farmer to adopt regenerative agricultural measures across the whole farm to increase soil health, reduce inputs and lower carbon footprint through increased carbon sequestration and reduced GHG emissions. These benefits will apply across neighbouring farms as the farmer has been contracted to undertake zero till cultivations on a number of holdings.	£32,800.00	£82,000.00	22/09/21	01/03/22
John Raw	Fryup	150 metres hedge planting and protective fencing	£3,210.00	£3,210.00	24/09/21	01/03/22
Ian Martin	Commondale	Concrete the main yard at Wayworth Farm to reduce the pollution entering the nearby beck.	£15,605.50	£23,000.00	01/11/21	31/03/22
John Beech	Mulgrave	To harvest the natural rainwater from the roof space at 3 locations across the 'in hand' farm. We will be installing 4 x 30,000 litre tanks across these locations accumulating 120,000 litres of water which will lead to a reduction in localised flooding in the Sandsend valley and provide a useful resource for the Estate's Home Farm.	£12,500.00	£14,900.00	27/09/21	19/11/21
Ben Jackson		Supporting farmers and land managers in the North York Moors National Park to improve the accessibility of the public rights of way network by offering support through the provision of gates and stiles to improve the standard of access over and above the statutory responsibility of land owners.	£31,430.37	£31,347.49	15/10/21	31/03/21
Murton Grange	Hawnby	To provide fencing and associated infrastructure to allow cattle to restoratively graze an area of Caydale SSSI in accordance with an agreement with Natural England.	£10,582.62	£10,582.62	15/10/21	01/03/22
Rob Wren	Ugthorpe	Upgrade farm infrastructure to improve resilience against extreme rainwater events and the impact of runoff. Slurry reduction through the covering of a yard and muck store.	£67,518.00	£67,518.00	01/11/21	31/03/22
Christine Thompson	Helmsley	The project will provide business skills support and financial recording training to enable each participant to assess the current financial status of their farming business and individual enterprise margins in preparation for future planning.	£1,970.00	£4,925.00	01/11/21	01/03/22
Kevin Roche	Fylingdales	Drystone wall restoration on Fouslyke Farm, Fylingdales to conserve historic features, enhance quality and character of the landscape.	£4,000.00	£5,600.00	01/11/21	31/03/22
Aidan Foord	Leaholm	Climate remediation and diversification works. The covering of a livestock feeding area; the installation of a farm vending machine and a rainwater collection tank and hedging and associated fencing.	£32,033.42	£32,033.42	01/11/21	31/03/22
Ian Cox	Goathland	Create new wildlife habitats and enhance visitor experiences on Abbots House Farm. Natural regeneration alongside Eller Beck through fenced exclusion of cattle. Gapping up to mitigate Ash die-back. The creation of small orchard for pollinator species. The creation of wildlife corridors along PROW. The creation of a picnic area for visitors and walkers.	£9,079.28	£9,079.28	01/11/21	28/02/22
Andy Thompson	Goathland	Green End Farm public footpath restoration and Wood Pasture Planting. To improve the ancient footpaths that run through Green End Farm to ensure safe and enjoyable walking, cycling and horse-riding for all. To create a wood pasture habitat with tussocky grassland and a variety of trees including flowering species which will produce a valuable habitat for invertebrates and link to existing areas of in field trees and scattered scrub to the north and west.	£29,158.70	£29,158.70	01/11/21	01/03/22
Andrew Hollins	Goathland	Bank stabilisation survey on the Murk Esk (c.150m) on Liberty Hall Farm. Training of NYMNPA Volunteers in the restoration of traditional boundaries.	£7,875.76	£7,748.91	01/11/21	31/03/22

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Daphne Jackson	Fryupdale	Restoration of traditional stone wall boundaries and contribution towards equipment that will help control pollution in and beyond the yard.	£5,010.00	£5,580.00	01/11/21	31/03/22
Glenn Mortimer	Glaisdale	To put in a hard-core track to improve the surface of the public footpath and to prevent poaching of the grassland caused by machinery accessing the farm yard manure heap, which has been re-sited from the yard, where it presented a pollution run-off risk to an in-field site where the pollution risk is less.	£3,931.20	£4,000.00	01/12/21	01/07/22
Christopher Padmore	Glaisdale	To rejuvenate the existing hedge, add more diverse hedge species, sequester carbon and enhance soil health.. To enhance the connectivity on the farm and provide an early pollen source (blackthorn flowers before most other pollen sources). Repairing a historic dry stone wall will protect the heritage of the farm and protect the landscape of the North York Moors National Park.	£3,186.00	£3,186.00	04/01/22	01/03/21
Edward Wilkinson	Castleton	Creation of a wildlife corridor of native broadleaf trees and shrubs between two existing habitats and to offer meaningful work opportunities to adults with learning disabilities living in the National Park.	£7,295.85	£8,363.85	10/01/22	30/04/22
Anthony White	Ravenscar	Improving access for the public. Protecting landscape between the moor and the sea. Protection of new wild flower meadow.	£3,775.90	£3,775.90	01/02/22	30/04/22
Ann Crowther	Kildale	To combine cutting of heather with traditional burning methods to improve the habitat condition. To reduce the risk of wild fire through cutting fire breaks in the heather and bracken To reduce the encroachment of bracken and scrub onto the heathland To achieve this through the purchase of a topper.	£2,400.00	£4,000.00	01/02/22	30/04/22
Aaron Davis	Upsall	Stage 2 of a project to repair a stone wall adjacent to ancient and semi natural woodland	£1,750.00	£1,750.00	07/02/22	19/04/22
Kevin Sayer	Scugdale	To fence off the river to exclude livestock, create a riparian wildlife habitat and improve water quality.	£3,924.30	£4,905.38	23/03/22	21/06/22
Raincliffe Community Woods	Scarborough	To fund the creation of a Community Woodland Outreach Officer (new post) to work with local people and communities to improve their connection to Raincliffe Woods and its heritage, inspiring more people to become involved with the community woodland through practical conservation volunteering, delivering a programme of heritage craft workshops and using traditional woodland management techniques.	£45,197.03	£65,085.00	13/04/22	30/10/23
David Edwards	Wykeham	To assess the biodiversity on 3 x 1km grid squares on the Dawnay Estate. The survey used the DEFRA Biodiversity Metric 3.0 to identify the habitats present within the survey squares and assessed their condition. The outcomes of the survey provide a baseline of habitat condition scoring to be used to complete a Natural Capital Audit for the Dawnay Estates and identified opportunities to increase biodiversity and improve habitats in the surveyed landscapes	£2,410.80	£3,013.50	26/04/22	15/11/22
Robert Sword	Spaunton and Danby Moors	North York Moors Peatland – Identifying practical solutions to improving the condition of peat and heather moorland of a depth of less than 40 cms. Improving includes; •Carbon sequestration •Biodiversity •Flood alleviation •Water quality	£5,000.00	£5,000.00	29/04/22	29/09/22
David Shepherdson	Ruston	To install pasture pumps and troughs to create watering points for cattle following a fencing project to exclude cattle from the beck and protect a SSSI	£493.00	£493.00	20/05/22	30/09/22
Anne Strang	Scawton	Enhance the natural environment on the farm to improve biodiversity and contribute to carbon reduction targets. Creating a wildlife corridor between two existing areas of trees by planting a new hedgerow and installing a new wildlife pond.	£22,431.20	£22,431.20	30/05/22	15/03/23

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Isabelle Harrison	Tranmire	To concrete the area of the fold and installing drainage between the winter cattle barns. This will control run off and improve water quality in the beck and onwards towards the Esk. It will also lead to better animal welfare.	£25,706.10	£36,123.89	30/05/22	28/02/23
John Malcolm Tindale	Hawsker	To establish 1.6ha of a winter bird food and pollinator mix.	£415.33	£415.33	30/05/22	24/06/22
Carol Barker	Hinderwell	To return the land known as the DALES which has been arable land for over 40 years, to long term grass leys.	£3,675.20	£3,675.20	01/06/22	04/02/23
Catherine Hatch	Fryupdale	To create a wetland habitat to encourage wildlife and provide habitat for ground nesting birds.	£10,097.00	£10,287.00	01/06/22	31/10/22
Amanda & Mark Smith	Fryupdale	To reduce the impact of farm business activities on the natural environment. To reduce nutrient and sediment pollution into local watercourses and improve and enhance the riparian habitat. To reduce the carbon footprint of the farm business through greater carbon sequestration. To restore existing historical landscape features that are important to the local heritage of the area.	£14,813.80	£16,567.36	01/06/22	24/02/23
Naomi Green	Across the North York Moors National Park	To support farmers and land managers in the North York Moors National Park to improve accessibility of the public access network	£12,211.64	£12,211.64	01/06/22	31/03/23
K W Boddy	Aislaby	To surface two gateways and a track to reduce runoff and improve water quality	£2,423.00	£2,423.00	10/06/22	28/10/22
RA Thompson	Westerdale	To support restoration works to the cow byre at Leath House which will be part of a listed buildings restoration project across the whole of Leath House Farm. This project will secure a listed building for the benefit of future generations and visitors to the National Park.	£22,400.00	£28,000.00	17/06/22	31/03/23
Jane Goodchild	Egton	To improve water quality by diverting water which runs down the road and through the farm yard into drains and inspection pits. This was done by concreting the entrance to the farm, installing a cross-drain and pipe to a new inspection pit. Concreting the lower yard and sloping it towards a new inspection pit and soakaway.	£4,480.50	£4,480.50	21/06/22	14/09/22
John Raw	Fryupdale	This project is to plant hedges around the farm. To create new habitat. To increase connectivity between habitats. To sequester more carbon. To increase biodiversity.	£9,198.60	£9,198.60	23/06/22	28/02/23
Mark Hayes	Langdale End	This project added 242 apple trees and provided equipment to support the orchard management process and help convert harvested apples into a local cider product. This is part of a larger project which has seen the planting of 6000 broadleaf trees to create a new woodland contiguous with existing woodlands, the creation of a wildlife pond and the planting of 250 "vintage" cider apple trees varieties on M25 root stock.	£8,917.74	£8,917.74	05/08/22	31/03/23
Ian Thorpe	Cropton	Peat Rigg is a not-for-profit CIC providing outdoor education operating from Peat Rigg Farm, which has a legal charge mandating the owners to use it for the benefit of young people for perpetuity. This comprehensive project delivers a reduced environmental impact, enhanced biodiversity and improved access onsite; by installing gates, building an onsite 2.5 acre pond, gapping-up hedgerows, restoring wildflower meadows and planting mixed native woodland.	£95,494.46	£151,230.13	08/08/22	31/03/24
Daphne Jackson	Fryupdale	Improving connectivity, biodiversity and carbon sequestration by planting 370 m of new mixed species hedgerow	£15,347.00	£15,347.00	09/08/22	31/03/23
Kenneth Knight	Fryupdale	This project improved connectivity across the farm, increased biodiversity, sequestered more carbon and improved water quality by creating 200m of new hedge row, gapping up 180m of hedge, installing 2 wooden farm gates, sowing a new wild flower meadow and planting 60 trees to support river bank side to prevent erosion.	£11,814.00	£11,814.00	12/08/22	31/12/23

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Yorkshire Wildlife Trust	BEACH Esk	To implement a catchment-scale restoration project on the Cock Mill/Rigg Mill Beck River network near Whitby to improve the ecological and chemical status of project watercourses and habitat extent. This project deliver highly across all four FIPL outcome areas (Climate, Nature, People and Place). The Yorkshire Wildlife Trust, who managed the project worked with 12 farmer/land managers and a team of volunteers to deliver outcomes at scale, connecting habitats within the wider countryside and improving resilience under a changing climate.	£101,049.59	£134,049.59	16/08/22	31/03/23
Oliver Foster	Egton Bridge	This project continues works completed through a 'Land of Iron' which aims to fence off all the watercourses on Egton Estate The project will create new habitats for wildlife, exclude stock and help to improve water quality.	£8,676.06	£9,337.96	19/08/22	20/12/22
Colin Bird	Staintondale	This project improved connectivity across the farm, increased biodiversity, sequestered more carbon and enhance the historic landscape by: Planting 587m of new hedgerows with protective fencing Planting 10 new trees with guards Creating 1,121m ² of wildflower plots Restoring 18m of drystone wall restoration Installing 3 x field gates	£15,963.66	£15,963.66	22/08/22	28/02/23
Neil Harland	Danby	To support the purchase of an aerator to better manage the grassland on a small upland hill farm in a way that benefits wildlife and water quality by better understanding soils and soil function on the farm and not using any bagged nitrogen fertiliser. In addition this farm will host a farm walk to enable knowledge exchange with other farmers farming a similar landscape.	£2,040.00	£3,900.00	01/09/22	01/12/23
Pamela Garbutt	Tranmire	Habitat creation and traditional hedgerow boundary restoration project on Castle Farm and High Tranmire Farm. To create a small wood pasture and wildlife corridor next to the Tranmire SSSI which occupies low-lying land adjoining Tranmire Slack and comprises wet grassland and meadow with willow scrub and acidic communities on peat.	£23,934.30	£23,934.30	06/09/22	31/12/22
Michael Dorman	Lealholm	Cultivate existing ley and sow new seed to create a new wildflower meadow and plant 10 in-field tree and protect with guards	£6,430.57	£8,038.21	08/09/22	28/03/23
Aidan Foord	Lealholm	To install a new shed to cover the existing slurry pit. The end result of the project is to stop any run off water from the slurry pit going into the watercourse and reducing the amount of slurry overall. To re-roof the Granary which is an early 19th century example of a Granary over a little stable and Coach house.	£21,621.66	£34,751.40	20/09/22	28/02/23
Ruby & Adam Tildsley	Suffield	To create a series of ponds and scrapes (to increase biodiversity & wildlife habitat) and construct a polytunnel (to provide learning & education space) on a regenerative no-dig market garden site. Working in partnership with local schools and organisations this project will aim to inspire the local community and develop skills in the area of regenerative agriculture, small-scale diverse farming operations & nature regeneration.	£13,536.68	£17,824.48	22/09/22	22/02/23
Mark Burrell	Chop Gate	To improve public access and reduce water sediment by improving a local bridleway, creating a new ditch and cleaning out an existing ditch alongside the bridleway.	£3,888.00	£4,860.00	26/09/22	31/03/23
Ellie Davison	Across the North York Moors National Park	This project trained NYMNP Volunteers in the creation of new wildflower plots/meadows and the planting of traditional heritage fruit trees to increase biodiversity and create habitats for pollinators. This training was supported by the NYMNPA Conservation team. Trained volunteers will then go on to work with the Ryevitalise Team and the Conservation Team to create wildflower meadows across the National Park.	£5,432.39	£5,432.39	28/09/22	31/03/23

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Tim Featherstone	Fadmoor	To create a 1.29 ha woodmeadow over the whole site by scarifying the land and sowing yellow rattle and monitoring and enhancing in year two.	£878.40	£878.40	12/10/22	01/11/22
Gordon Oswald	Sneaton	To extend a small, existing historic orchard by adding 50 fruit and nut trees	£8,011.50	£8,011.50	17/10/22	31/03/23
Andrew Boddy	Aislaby	This project increased connectivity across the farm, created shelter belts and increased biodiversity and carbon sequestration by plant 377m of new hedge and gapping up 403 m. Plant 710 tree to create 10m wide wildlife corridors and protect both the trees and the hedges with 2,378m of sheep netting	£30,198.05	£30,198.05	19/10/22	01/02/23
Oliver Cornforth	Guisborough	To create a wetland habitat and improve water quality by establishing a swale ditch - 160m long by 3m wide to catch run off from farm yard area and divert into new sediment ponds	£7,851.00	£7,851.00	20/10/22	31/12/22
Hazel & John Green	Littlebeck	To improve connectivity across the farm, create wildlife corridors and to improve wildlife habitat by planting 192m of new hedges and coppicing and gapping up 46m of existing hedges and planting 23 trees All planting will be protected with double fencing and tree guards.	£11,421.29	£11,421.29	26/10/22	01/03/24
Peter Mawson	Farndale	This project supports a larger regenerative farming project on the holding by installing 623.8m of rabbit netting to protect permanent pasture, drilled herbal ley and naturally regenerating trees from rabbits.	£1,559.50	£1,559.50	04/11/22	01/11/22
Robin Bunton	Appleton le Moors	This project has improved and created new habitat in what is currently an improved grassland field. This project is a two-year project that will have, when complete, Restored 450m of hedgerow and add boundary trees to replace dying trees Restored an existing dew pond, Established a new orchard, Planted a selection of native broadleaf parkland trees, and developed an area of grassland diversity.	£18,452.57	£18,452.57	17/11/22	31/10/24
Fraser Hugill	Across the North York Moors National Park	This project builds on the work of the Derwent Dales and Esk Valley Farmers CS Facilitation groups to increase participants understanding of FIPL themes and priorities to help them navigate the agricultural transition period by delivering a range of knowledge transfer activities.	£24,142.30	£24,142.30	18/11/22	31/03/24
Robert Foster	Littlebeck	This ambitious two-year project will create new habitat, improve existing habitat, restore historic features and improve water quality across four farms in the Littlebeck area. It will create 1,520m of new hedges, restore 923m of existing hedges, plant 500 new trees, restore 262m of drystone walling, create a livestock crossing point and conduct drain repairs, install 418m of fencing to protect a watercourse and improve the riparian habitat and protect all planting with associated fencing and tree guards.	£94,949.26	£97,205.20	29/11/22	31/03/24
Ian Teasdale	Pockley	This project will reduce run-off, improve water quality in the surrounding area and improve farm resilience by installing 3 x 10000 litre water tanks for rainwater harvesting from new shed roofs	£3,580.20	£5,555.20	01/12/22	13/03/23
Nicholas Finlayson-Brown	Fryupdale	This will be a four-year project to restore 2,00m of drystone walls at Fryup Lodge. This application is to restore 170m of wall and install top netting to protect the walls for the future. The remainder will be completed with support from the S106 Traditional boundaries scheme.	£6,049.00	£6,049.00	02/12/22	01/03/23
Stephen Savage	Scaling	To increase biodiversity and create new habitat by: Planting 198m of hedgerow plus an additional 175m of gapping up. Fencing to protect hedgerows. Planting 1,364 native broadleaf trees, 12 orchard trees, and 4 parkland trees with tree protection. Creating 2,370m ² of wildflower meadow and installing 3 tawny owl boxes. 3 x bat boxes.	£19,476.98	£19,680.15	02/12/22	28/03/23

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Simon Plumb	Farndale	Planting 82 m and 96 m of hedgerow with double fencing to stop animals from disturbing/destroying them so that they will grow into a thick hedge enticing wild birds, insects and butterflies to the farm increasing diversity and enabling wildlife to flourish in the new habitat. There will be 30m of walls to repair on the project.	£5,231.58	£5,231.58	06/12/22	15/03/23
Robert Ventress	Littlebeck	This project has improved existing habitat and improved connectivity by laying 118 metres of hedgerow with 238 metres of double stock proof fencing and gapping up 26 metres of hedge with protective fencing	£4,463.36	£4,463.36	16/12/22	31/03/23
Christopher Padmore	Glaisdale	This project has improved existing habitat and improved connectivity by laying 30m, coppicing 35m and gapping up 20m of hedgerow with 170m of double stock proof fencing.	£2,206.45	£2,206.45	21/12/22	31/03/23
Richard Bell	Cold Kirby	The project will reduce the risk of run-off, help to improve local water courses and increase farm resilience by installing 2 x 20,000 litre rainwater collection tanks and 1 x 10,000 litre rainwater collection tanks	£6,698.36	£6,698.36	21/12/22	30/02/2023
Richard Fairburn	Rievaulk	This ambitious project has delivered high levels of connectivity and habitat improvements across two farms by planting and gapping up 2.5km of hedges with fencing at Harriet Air Farm and fencing 0.5km of riverbank and water courses to improve water quality and create new riparian habitats at Ristbrow Farm.	£38,754.78	£39,004.77	22/12/22	15/03/23
Stewart Mechie	Cold Kirby	This project has created new habitat, improved biodiversity, connectivity and carbon sequestration and restored features in the historic environment by- Planting 220m of new hedgerow and protect with fencing. Restoring 50m of wall along a 200m stretch. Planting 4 parkland trees with tree guards.	£9,316.70	£9,316.70	22/12/22	01/02/23
Tim Johnston	Wrench Green	This project is one of two projects planned for this holding. This first project has created 550 Metres of new hedgerow protected by sheep netting and planted 20 fruit trees with tree guards to create an orchard	£19,946.60	£19,946.60	22/12/22	25/02/23
Jack Bell	Ingelby Arncliffe	This project will reinstate old field boundaries by coppicing and fencing 706m hedgerow and installing 6 field gates. The farm will then implement a regenerative, paddock grazing system using 4 water troughs (including one with a solar powered pump) along with hard standing, 304m pipework, a plate meter, electric fence energiser and electric fence fault tester.	£23,227.69	£23,227.69	03/01/23	01/02/24
Naomi Green	Glaisdale	To undertake drainage and surface improvements along public footpath running along a historic track up the dale side. The proposal is part a wider project to access improvements in the dale and this element requires engaging a specialist contractor. The proposal will benefit the local community, visitors and the farm.	£9,000.00	£19,600.00	03/01/23	28/02/23
Ian Hogarth	Fryupdale	A two-year project to improve water quality and create new habitat by excluding stock from a water course and also laying a hedge to create a better habitat	£14,563.77	£14,563.77	04/01/23	31/12/23
Steven Blockley	Staintondale	This project is in support of a NYMNPA Woodland Creation project. The planting of 213m of mixed hedgerow linked newly created woodland to and exisit woodland habitat	£4,892.61	£10,111.46	24/01/23	20/03/23
Ian Ford	Glaisdale	To manage water flow across the farm to reduce run-off and improve water quality. Improvements included: Concreting 115 sq m of yard, installing two x sediment traps/inspection pits and installing new underground piping to manage the flow of water between the sediment traps.	£4,387.78	£4,387.78	25/01/23	17/03/23
Robin Asquith	Botton Village	Planting of 200m hedge row with stock fencing. Installation of new shed guttering and rain water harvest tank on dairy unit to reduce slurry run-off. Installation of improved stock fencing increasing buffer zone between grazing cattle and beck.	£10,349.69	£10,349.69	30/01/23	31/03/23

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Hugill & Eaton		This project will look at the process of re-seeding, working with an independent grassland expert and Leeds University to trial different approaches to grassland re-seeding across 10 farm holdings.	£13,265.54	£17,203.04	01/02/23	31/03/24
Fraser Hugill	Across North York Moors National Park and Howardian Hills AONB	This experimental project, is a joint HHAONB/NYMNPA project, match funded by Innovate Farming. The project, which looks at the process of re-seeding, sees farmers and facilitators working with an independent grassland expert and Leeds University to trial different approaches to grassland re-seeding across 10 farm holdings. Leeds University baselined each farm and an independent grassland expert has developed bespoke mixes using legume, herb and grass species, particularly looking at cocksfoot leys. The project will assess how they perform against conventional off the shelf leys to inform farmer in the NYMNP and HHAONB on how to improve environmental sustainability and farm profitability.	£14,012.25	£18,281.60	01/02/23	15/03/24
Mark Phalp	Great Ayton	This large habitat creation and improvement project is located at the foot of Roseberry Topping. The farmer worked with NYMNP volunteers to plant 814m of new hedges and gap up another 100m more. The hedges were protected with sheep netting.	£27,247.16	£27,247.16	01/02/23	12/03/23
Dan Sayers	Swainby	Habitat creation and restoration by installing 110m of stock fencing to create a riparian zone, gapping up 100m of existing hedgerows and installing 200m of stock fencing to protect hedges.	£4,826.40	£4,826.40	02/02/23	01/03/23
Steven Bowes	Helmsley	This project planted 480 m of new mixed species hedgerow protected with stock fencing along the main Helmsley to Stokesley road	£14,611.20	£14,611.20	15/02/23	31/03/23
Patrick James	Sleightholme Dale	Planting 220m of new hedging along the roadside	£6,696.80	£6,696.80	16/02/23	31/03/24
Alexander Digby Guthe	Nether Silton	This large connectivity project planted 650 metres of hedgerow with 1300 metres of protective sheep netting	£24,641.50	£24,641.50	23/02/23	31/03/23
John Allsopp	Stape	This project supports a project to plant 3.05 hectares of new mixed broadleaf woodland through the NYMNPA S106 Woodland Creation Scheme. The project delivered: 173m of dry-stone wall restoration work to improve the historic environment and 313m of new hedges with hedgerow trees in increase connectivity, biodiversity and carbon sequestration. 125mtrs of hedgerow gapping up to restore existing hedgerows. A new culvert with new trackway to create a crossing point. Installed 2 x field gates	£24,993.79	£67,550.58	24/02/23	31/03/24
Aidan Foord	Lealholm	To deliver phase three of the Wild Slack project to reduce slurry and dirty water produced by the beef herd and to enhance biodiversity, water retention and reduce the use of synthetic fertilisers with a new managed grazing system. To deliver phase three of the Wild Slack farm shop vending machine project by increasing the frozen storage capacity needed to keep the meat to keep up with demand.	£10,745.58	£11,440.36	28/02/23	31/03/23
Guy Prudom	Egton	This project supports a regenerative agriculture system on the farm by installing a 10,000lt buffer water tank and a solar powered water pump, to increase the water supply to cattle being kept on a paddock/ rotational grazing system.	£3,434.80	£7,986.80	01/03/23	01/05/23
Richard Smith	Ugthorpe	To create a wildlife corridor by fencing off 100m of beckside	£747.00	£747.00	03/03/23	31/03/23
Anna Hare	Across seven protected landscaped	To create printed resources for primary school children visiting protected landscapes as part of the Let's Learn Moor Project. This project will help support educational events across seven Protected Landscapes over the next 3 years	£4,878.00	£20,378.00	27/03/23	31/03/23

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Ian Thorpe	Cropton	This project supports and enhances a previous project at Peat Rigg by planting an additional 380.5 metres of new hedgerow and coppicing 65m of old hedgerow. The project will also install sheep netting and a wooden field gate to allow for land management around the pond previously created.	£21,039.73	£21,039.73	10/05/23	01/01/24
Jack Bell	Ingelby Arncliffe	To enable a move to a regenerative agriculture approach using a mob/paddock grazing approach by installing 12 water troughs with hard standing, 921m pipework, resurfacing 8 gateways and 625m of permanent electric fencing. Other capital items include 2 solar powered electric fence energiser, 9 Rappa electric fence reels and 4 Kiwitech Integates.	£12,027.32	£12,298.58	12/05/23	01/02/24
Christopher Padmore	Glaisdale	The excavation of two shallow sediment ponds <0.1 ha linked by a dam constructed of boulders and clay	£6,843.40	£6,843.40	01/06/23	31/07/23
Peter Mawson	Farndale	Install new rabbit netting. Rebuild dry stone walls to protect permanent pasture and naturally regenerating trees from rabbits. Build new retaining wall to prevent soil erosion. Protect 18 established trees with weldmesh cages. Build one new 35m of land drain. Restore two sections of land drain.	£9,519.63	£9,637.95	01/06/23	30/09/23
Mark Burrell	Chop Gate	To enable a move to a regenerative agriculture approach using a mob/paddock grazing approach by installing 636m of 25mm water pipes, 7 x troughs with hard bases, 4 x wooden field gates and 228m of fencing Purchase a grassland aerator to stimulate microbial activity and let air to the roots.	£9,138.45	£10,893.45	08/06/23	01/10/23
John Simpson	Scarborough	A habitat connectivity project to plant a mix of hedging plants and in-hedge trees for 312m with spiral guards and fencing both sides to create stock proofing and wildlife corridor. A wooden field gate in the hedge will allow access for management of the fields	£12,455.88	£12,455.88	23/06/23	01/03/24
Yorkshire Wildlife Trust	Across the North York Moors National Park	BEACH Esk is an Environment Agency funded project, delivered by the Yorkshire Wildlife Trust. The project will deliver a catchment-scale restoration project on Mitten Hill, Intake & Sneatonthorpe Becks to improve the ecological and chemical status of the watercourses as well as habitat extent/connectivity. This will be achieved by working in partnership with landowners/managers to deliver a capital works programme across multiple holdings in the Lower Esk Catchment. This will build on work delivered on Rigg Mill Beck in 2022. Works will include fencing off watercourses, tree-planting, hedgerow creation and grassland restoration across 12 participating holdings.	£81,335.91	£122,335.91	26/06/23	25/03/24
Elizabeth Asquith	Ainthorpe	To establish a 14-tree heritage orchard within an existing grass field and create 100m of new hedging for habitat creation	£4,295.92	£4,295.92	11/07/23	01/11/23
Anthony Evans	Saltersgate	The creation of a wildlife pond. Exclude stock with 100m of stock fencing and install a wooden field gate for management purposes. Plant 15 standard parkland trees with guards. Create scrub areas by planting 100 trees with guards.	£5,643.58	£7,553.04	01/08/23	30/11/23
Michael & Kirsty Knight	Fryupdale	To enhance a current project by restoring three ponds, which have been unmaintained for many years by removing silt and creating deeper ponds that will benefit all wildlife, species and encourage a wider variety.	£2,206.82	£2,206.82	01/08/23	31/10/23
Paul Robinson	Wass	Pond creation x 900m2 Plant 6 x standard parkland trees and protect with guards. Create a small orchard with 16 fruit trees and protect with guards. Create 3 x 5m2 scrub enclosures. Create a .324ha wildflower meadow	£8,370.60	£16,001.69	01/08/23	31/03/25

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Lorna Harrison	Silpho	To baseline and receive advice on switching to a regenerative agriculture approach. To establish herbal leys on 19.88 ha of the farm. To install the infrastructure to enable a move to a paddock/mob grazing approach. To work with the Birds on the Edge Project. Officer to restore an existing dew pond and create habitat for Turtle Doves and other endangered bird species.	£14,400.45	£20,500.55	31/08/23	31/03/24
Andrew Boddy	Aislaby	Reseeding 2 fields (4.45 ha) with mixed species leys, compare and contrast the outcomes in a dry valley field and the other which is in an exposed coastal location. Plant 158m of new hedge	£5,233.76	£5,642.96	01/09/23	31/03/24
Christopher James Carr	Goathland	Stock proof fencing (1240m) Native Hedgerow planting 570m Wildflower hay meadow (4.23 hectares) New Woodland (0.05 hectares) 2 x New oak benches Excavate field ditches (570m)	£29,445.51	£30,860.30	01/09/23	31/03/25
Daphne Jackson	Fryupdale	We will place a solar powered water pump in the river at the bottom of our fields at Applegarth and pump the water to the top fields and place water troughs in 8 fields to stop the cattle drinking from the river. We will put up an electric fence with 4 access gates in to protect the PROW. We will use a solar powered energiser to run the electric fences that protect the PROW. We will put some 44.63 metres of livestock tracks from the council road to our Woodfield which will allow us to always be able to travel with Farmyard manure without dragging mud and soil back onto the road. We will gap up 80 metres of hedge in field and lay 104 metres of hedge.	£17,781.01	£18,188.21	01/09/23	20/03/24
John Raw	Fryupdale	Planting 86 metres of mixed species hedge along with 86 metres protective stock fencing, creating new habitat and link to existing. Restoration of 3 metre section of drystone wall reinstating connection to existing habitat whilst stock proofing opposite side of new hedge. Includes 12' wooden access gate.	£3,203.47	£3,203.47	01/09/23	31/03/24
Joseph Winkfield	Cloughton	Eradication of 2 hectares of rhododendron in order to create an environmentally friendly charcoal product, whilst also allowing for natural woodland regeneration	£7,988.19	£8,647.50	01/09/23	31/03/25
Mark Day	Ingleby	Creation of 500m2 scrapes, create three ponds, planting 113m hedgerow and 5 parkland trees. Creation of farm vending in old dairy, selling home grown/ local produce. Whole farm agronomist report	£14,193.00	£27,769.39	01/09/23	31/03/24
John Cave	Across the North York Moors National Park	Complimenting the wider River Dove Natural Flood Management (NFM) Project, this project aims to reconnect a total of 1.8km of the River Dove with its floodplain at two locations within the lower catchment. This will increase catchment flood storage and improve riparian and wetland habitats. Phase 1 will commission a detailed design and feasibility study to identify the most effective approach to deliver these benefits	£9,955.00	£20,231.00	04/09/23	30/11/23
Stephen Thompson	Glaisdale	Planting 7.87 ha of unused land in new woodland through the NYMNPA Woodland Creation Scheme. Fencing 330m to stop livestock polluting watercourses and the beck. Putting in a rainwater harvester to utilise the water for cleaning purposes. Restoration of a pond situated in a possible bomb crater. Coppice 12 trees surrounding the pond above. Install an owl box in an in-field barn. Setting up a pasteurising area so that we can pasteurise and sell our milk from a vending machine.	£20,737.47	£120,572.92	15/09/23	31/03/24
Graham and Julie Howard	Kildale	Plant 5 standard parkland trees with guards. Plant 5 in-hedge trees with guards. Plant 218m of new hedges with protective fencing. Coppice 20 trees to open out a pond and complete a restoration of the pond.	£12,375.33	£24,168.99	01/10/23	01/03/24

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Mark Hayes	Langdale End	This part of the project is to build on the apple management element of the farm by expanding the proof-of-concept project last year to be able to deal with higher volumes of apples and create traditional apple-based produce that will be sold into local markets.	£6,005.73	£15,014.33	01/10/23	01/06/24
Rose Sutcliffe	Kildale	Wildflower meadow creation to improve biodiversity, water quality, public enjoyment and soil quality	£6,494.40	£8,118.00	05/10/23	31/03/24
Ruby & Adam Tildsley	Suffield	Habitat creation and biodiversity improvements through tree & hedge planting and creation of a permanent diverse-species flowering hay meadow on previously arable land.	£20,244.94	£21,182.60	10/10/23	31/03/24
Elaine & Dave Newham	Burniston	Funding for a feasibility study to record the historic environment at the lime kiln site and to assess the feasibility of a restoration. Plant 6 trees.	£6,389.00	£6,389.00	25/10/23	31/03/24
Paul Adamski	Fryupdale	Restoration of existing hedgerows some of which is alongside a watercourse. This will include new hedge, gapping up and coppicing of existing, amounting to 485m of connected hedgerow habitat.	£9,219.18	£9,219.18	21/11/23	31/03/24
Amanda & Mark Smith	Fryupdale	Planting of 180m's of hedgerow with hedgerow trees. Planting of 50 trees to enhance riparian woodland habitat.	£7,069.42	£7,069.42	22/11/23	31/03/24
Christopher Padmore	Glaisdale	Project involves hedge laying, gapping up and Coppicing. Building 3 Culverts on Bridleway. Diverting the outlet of a small pond to protect an existing boundary.	£7,708.30	£8,214.70	22/11/23	31/03/24
Richard Fairburn	Rievaulk	Plant and gap up 1085km of hedges with fencing and 18 hedgerow trees	£40,777.27	£40,777.27	22/11/23	31/03/24
Mark Burrell	Chop Gate	This project will use an independent sheep and beef consultant with an interest in grass and forage management to develop as support package to help the farm transition to being a resilient, nature friendly and sustainable farm business.	£1,800.00	£3,000.00	27/11/23	31/03/25
Linda Rayment	Littlebeck	Planting of 34 orchard (fruit and nut) trees of mixed types, alongside planting of 6 willow and alder to improve biodiversity, sequester carbon and increase land stability and drainage, as per discussion and visit to site	£6,984.42	£6,984.42	01/12/23	31/03/24
Samuel Stone	Scalby	A joint project with Woodland Creation and Birds on the Edge. Habitat creation, restoration of original hedge boundaries to connect existing hedgerow and trees and installation of wildlife pond	£2,449.50	£39,115.93	01/12/23	31/03/24
RA Thompson	Westerdale	To restore the final two traditional farm buildings at Leath House as part of an ongoing restoration programme supported by the NYMNPA Building Conservation Department.	£53,949.96	£89,769.96	04/12/23	31/03/25
Jonathan Fairburn	Helmsley	The project is to commission a farm infrastructure and water management appraisal to identify appropriate actions for improving the environmental profile of the farm yard and environs, and for reducing point source and diffuse pollution in the wider sense.	£1,180.00	£1,475.00	05/12/23	31/03/24
Elaine & Dave Newham	Burniston	Part 2 of project. The excavation and recording of the kiln mouth, quarry ditch, and kiln mound and flue.	£5,751.60	£5,751.60	19/12/23	31/03/25
Guy Prudom	Egton	The project aim is to create paddocks of approximately 0.8 hectares in three fields using permanent electric fencing and install the necessary water infrastructure.	£5,359.60	£8,565.23	20/12/23	31/03/24
Guy Prudom	Mickleby	The aim is to create paddocks of approximately 0.8 hectares in three fields using permanent electric fencing and install the necessary water infrastructure.	£5,359.60	£8,565.26	20/12/23	31/03/25
Stephen Bowes	Helmsley	They will create: 190m of Riparian fencing and the creation of 0.56 ha of riparian buffer strip. Install trough, with piping and hardstanding. Install wooden access gate for stock retrieval	£4,094.87	£6,086.07	08/01/24	31/03/24
Jim Bailey	Spaunton	To conduct a feasibility and design study for the installation of a cattlegrid in near Low Askew bridge on the road between Lastingham and the Manor of Spaunton boundary to maintain graziers livelihoods and management of Spaunton Common.	£14,775.00	£14,775.00	09/01/24	31/03/24

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
John Beech	Mulgrave	To restore the section of old railway line close to Runswick Bay to enable easy access for all users. The culvert structure under the old railway line is no longer useable as it has subsided leading to closure of the current access track.	£18,000.00	£22,500.00	16/01/24	31/03/24
Michelle Hodgkinson	Littlebeck	Aim is to increase the number of apple trees which will help towards biodiversity creating a much-needed new habitat for wildlife and improve connectivity across the valley, it will also reduce flooding, improve water quality and help carbon reduction.	£7,808.92	£7,888.92	22/01/24	31/03/25
Anna Hare	Kildale	Education Days for Primary School Children to Kildale Estate	£3,950.00	£5,450.00	08/02/24	31/03/25
Stuart Beeforth	Chop Gate	Laying 248m of hedging to create longterm habitat	£3,352.96	£3,352.96	08/02/24	31/03/24
Mark Day	Chop Gate	Implementing the recommended by the agronomist supported through our last FIPL application. Our aim is to create heathy soil, healthy grass and healthy stock.	£3,732.28	£6,221.30	19/02/24	31/03/25
Rebecca Thompson	Across the North York Moors National Park	Farming Forward. To support the delivery of a trial project aimed at progressive farmers who want to develop their businesses further.	£15,450.00	£15,450.00	13/02/24	31/03/25
Aidan Foord	Leaholm	The project is to mount 5kw worth of solar panels on the traditional stone building which houses their meat vending machine.	£4,140.00	£10,350.00	19/02/24	31/03/24
Bernard Moss	Farndale	This project seeks to collect data on the breeding activity of curlew on the Bransdale Estate by utilising GPS tagging.	£8,025.00	£8,025.00	19/02/24	31/03/25
Sean Myers	Thorgill	Habitat creation at Low Thorgill, planting 29 parkland trees.	£7,426.00	£7,426.00	22/02/24	31/03/24
Jacob Lawson	Newtondale	Reintroducing grazing to species rich grassland in Newtondale SSSI	£4,597.40	£5,157.40	26/02/24	31/03/24
Mark Burrell & Fraser Hugill	Chop Gate	Establish herbal leys with a grassland rejuvenerator that avoids the need for inversion tillage	£5,000.00	£12,500.00	26/02/24	31/03/24
Steve Mills	Saltwick	Semi-soft release of approximately 350 captive-bred Harvest mice, into the fields at Haggitt Howe, with post-release monitoring conducted the following winter	£4,200.00	£4,200.00	26/02/24	31/03/25
Mark Harrison	Buscoe	New hedgerow for Busco Beck. 229m	£6,970.76	£6,970.76	28/02/24	31/03/24
Simon Plumb	Farndale	Habitat creation of hedgerows at Keysbeck Farm, Farndale. To support the creation of 70 metres of mixed species hedge with 140m of stock fencing.	£2,653.70	£2,653.70	28/02/24	31/03/24
Blackfaced Sheep Breeders Society		Funding representatives from The Foundation for Common Land to come and talk members through the requirements of entering common land that they graze into the Sustainable Farming Incentive	£660.00	£660.00	01/03/24	31/03/25
Elaine & Dave Newham	Burniston	The final phase of excavation at the lime kiln in Burniston. This part of the project will record the historic environment surrounding this lime kiln and inform potential restoration works moving forwards.	£9,036.36	£9,036.36	05/03/24	31/03/24
Jack Bell	Ingleby Arncliffe	Installing 11 water troughs with hard standing, (1,789 on PCT) pipework, 253m of permanent electric fencing, 1,117m sheep netting, 131m hedging and resurfacing 18 gateways. Other capital items applied for are 1 solar powered electric fence energiser, 1 Kiwitech Integate and 4 wooden field gates. There are also a further 8 livestock troughs in place that require hard bases.	£27,497.32	£27,537.77	05/03/24	31/03/24
Andrew Potter	Farndale	Funding will be used towards purchasing a battery powered, self propelled, bedding dispenser with a motorised brush, allowing the efficient and consistent management of cow cubicles.	£4,600.00	£11,500.00	06/03/24	31/03/24
Patrick James	Sleightholme Dale	This project aims to aid the recovery of Pied Flycatchers in their historic range in Sleightholmedale	£5,038.60	£5,496.00	06/03/24	31/03/25
Mark Day	Chop Gate	Daylighting of culverted watercourses to create improved riparian habitats. Reinstate the original stream system prior to the culverts being inserted in the 1800's.	£14,193.00	£14,193.00	01/04/24	31/05/24
Richard & Alison Menage	Husthwaite	Daylighting of culverted watercourses to create improved riparian habitats. Reinstate the original stream system prior to the culverts being inserted in the 1800's.	£14,193.00	£14,193.00	01/04/24	31/05/24

FIPL Approved Projects NYMNPA

Applicants Name	Location	Short Description of Project	Total FIPL Grant	Total Project Cost	Project Start Date	Expected Completion Date
Andy Fawbert	Farndale	Culvert replacement at Hall Farm. The diameter of the existing culvert is too small, which leads to blockages, sediment build-up and flooding of the Public Right of Way above. The works proposed will replace the culvert with a wider pipe (600 mm diameter).	£1,474.56	£1,843.20	01/05/24	31/05/24
Camphill Village Trust	Botton Village	Botton Community Composting Project. Creating new compost bays and providing the equipment for green care opportunities relating to composting for the Botton community.	£2,018.54	£2,523.17	01/05/24	31/03/25
Edward Hampartsoumian	Lealholm	Pond Restoration and habitat creation at Carr Wood, Underpark Farm	£10,644.00	£12,240.00	01/05/24	31/03/25
Fiona Dickson	Wass	Investigating agroecology solutions for sustainable orcharding	£5,007.96	£8,695.96	01/05/24	31/03/25
Fraser Hugill	Across North York Moors National Park	This project will build on the previous work of the Derwent Dales and Esk Valley Farmers groups to increase participants understanding of FIPL themes and priorities. A particular focus of the project will be helping farmers add value to the Sustainable Farming Incentive (SFI) and the new agri environment schemes.	£36,503.98	£36,503.98	01/05/24	31/03/25
Fraser Hugill	Across North York Moors National Park and Howardian Hills LN	The grassland sustainability project was set up in Nov 2022 with FIPL support. In 2023 we undertook phase 1 which involved baseline monitoring and getting the plots established. With the plots now in the ground phase 2 is about monitoring progress and continuing to learn the lessons.	£9,837.41	£19,967.42	01/05/24	31/03/25
Mark Burrell	Chop Gate	Creation of new ditch and bridleway Improvements. Dig a new ditch across a field and install crossing point. Clear off dirt from bridleway and lay new stone.	£5,413.68	£6,416.10	01/05/24	01/10/24
Michael & Tracey Cook	Chop Gate	Habitat and water quality improvement at Staindale Farm	£11,576.30	£13,816.30	01/05/24	31/03/25
National Trust	Newton under Roseberry	Roseberry Topping – Footpath Restoration for Access and Biodiversity Improvements	£144,292.00	£221,987.00	01/05/24	31/03/25
The Country Trust	Across North York Moors National Park	Educational farm visits for disadvantaged children.	£23,179.54	£23,179.54	01/05/24	31/03/25
Fraser Hugill	Across North York Moors National Park	This project will build on the previous work of the Derwent Dales and Esk Valley Farmers groups to increase participants understanding of FIPL themes and priorities. A particular focus of the project will be helping farmers add value to the Sustainable Farming Incentive (SFI) and the new agri environment schemes.	£36,503.98	£36,503.98	14/05/24	31/03/25
Jennifer Smith	Hutton le Hole	This project will raise awareness and spark debate about a different way of producing better bread.	£6,933.08	£10,297.70	10/06/24	37/3/25
Liz Watson	Staithe	Building restoration of an at risk historic listed farm building at Red House Farm	£41,908.80	£52,386.00	01/07/24	31/12/24
Yorkshire Wildlife Trust		BEACH Esk is an Environment Agency funded project, delivered by the Yorkshire Wildlife Trust. This year's focus will deliver a catchment-scale restoration project along Mitten Hill Beck near Normanby to improve the ecological and chemical status of the watercourse as well as habitat extent/connectivity. This will be achieved by working in partnership with landowners/managers to deliver a capital works programme across multiple holdings in the Lower Esk Catchment. This will build on work delivered in the catchment since 2022.	£57,013.78	£98,013.78	01/07/24	31/03/25
Henry Morgan		Complementing the wider River Dove Natural Flood Management (NFM) Project, this project aims to reconnect 1km of the River Dove with its floodplain at Grouse Hall. The models and designs of which were generated through phase 1 (a FIPL funded project). Phase 2 constitutes the delivery phase of this work.	£69,720.00	£116,200.00	31/07/24	31/03/25
John Simpson	Faceby	This project wishes to provide a pond (~157 square metres). Along with a wildflower meadow of approx. 0.32 hectares	£8,196.56	£10,245.70	01/08/24	30/09/24
Harriet Lyon	Farndale	This project will bring a historic building which otherwise become obsolete/ dilapidated back into use by converting the barn to a camp barn.	£54,794.16	£91,323.60	01/08/24	31/03/25
