Introduction

Priorities, resources and performance

The Business Plan sets out how the National Park Authority will allocate its resources and generate income to achieve its objectives over the next four years.

The Plan is set within the context of the National Park Management Plan, with its long-term vision and ambition for the range of organisations working to look after the National Park. Its content has been influenced by a wide variety of data, survey results and consultations. It has also been influenced by the DEFRA ‘8 Point Plan’ for National Parks.

Context
The Values of the North York Moors National Park family, National Park purposes, the Authority’s mission and the Vision from the Management Plan can all be found in Appendix 1.

Strategic priorities
Over the next four-year period we have identified four key areas where we especially want to focus our efforts. These are:

- Establish effective wildlife corridors in the National Park.
- Increase the profile of the North York Moors to achieve the Second Purpose and support the local economy.
- Inspire young people to understand and experience the North York Moors and be actively involved in its future.

And as a cross-cutting theme

- Maintain efficiency and act ambitiously to maximise income while delivering Park Purposes.

Structure
The structure of this document follows that of the National Park Management Plan:

- Environment
- Understanding and Enjoyment
- Business and Land Management
- Communities.

We have added a fifth heading to set out how we will work to be an effective and efficient organisation.

- Corporate Services
Performance on the previous Business Plan

A full analysis of the previous business plan and its interim successors was carried out in July 2016. This highlighted the actions that had not been carried out. Details of this can be found at [http://www.northyorkmoors.org.uk/about-us/meetings-and-agendas/scrutiny-committee/july-2016/Item-6.pdf](http://www.northyorkmoors.org.uk/about-us/meetings-and-agendas/scrutiny-committee/july-2016/Item-6.pdf). Those actions which have not been carried out and remain important have been included in this Plan.

Performance framework

The National Park Authority is strongly committed to accountability and performance. Our overarching performance framework is shown in Appendix 4. This Business Plan is key to the framework. As part of our performance reporting cycle we will provide six-monthly updates on our progress towards the objectives and achievement of targets set out here. At our annual scrutiny meeting an annual report on progress towards the aims in the National Park Management Plan will be provided, which will also provide an overview of how the Authority is contributing towards the aims in the Management Plan through the implementation of this Business Plan.
Financial overview

Medium term financial strategy

Summary of financial principles (see Appendix 2 for full document)

</thead>
<tbody>
<tr>
<td>Staff cost including fixed-cost pension and core outsourced services is maintained at around 55% of gross expenditure.</td>
<td></td>
</tr>
<tr>
<td>Generate a minimum of £6m over the Business Plan period (average £1.5m pa) through external funding.</td>
<td></td>
</tr>
<tr>
<td>Retain a level based on 5% of gross expenditure (approx £320k).</td>
<td></td>
</tr>
<tr>
<td>There is steady growth of approximately 10% pa in earned income, leading to around £1.6m by 2021/22.</td>
<td></td>
</tr>
<tr>
<td>Benchmark at least 3 areas of corporate activity.</td>
<td></td>
</tr>
<tr>
<td>Corporate and Democratic core costs are 5% or less when expressed as a % of gross cost.</td>
<td></td>
</tr>
<tr>
<td>Total expenditure on grants is increased to 10% taken as a running average of the last four years’ gross spend.</td>
<td></td>
</tr>
<tr>
<td>Undertake a benchmarking exercise to ensure that planning applications are delivered in the most cost-effective way.</td>
<td></td>
</tr>
</tbody>
</table>

Financial context

In January 2016 it was confirmed that the funding for National Parks would be protected in real terms for the next four years. The National Park Authority grant for the years 2016/17 to 2019/20 is shown in Table 1; for the purposes of this Medium Term Financial Strategy (MTFS) a further 1.7% increase has been factored in for 2020/21.

This follows a period of significant change for the Authority, as between 2010 and 2015 the real value of central National Park funding fell by approximately 40%. The Authority’s approach during that period was to continue to drive efficiencies but also to focus on the development of income generated by existing and new activities and other grants. Some areas of service delivery have been reduced or removed entirely (most notably the Moorsbus network) and working practices have changed significantly. These changes have put the Authority in a strong position to respond to the new financial context.

Overall strategy

The overall strategy is to significantly increase the Authority’s resources because the achievement of National Park Management Plan policies requires this. Resources deployed by partner organisations in pursuit of Management Plan policies have already declined in some cases and seem likely to decline in further areas, following a period of growth prior to the financial crisis of 2008.
It is therefore planned to increase the real-terms value of earned income (income from fees, sales, charges, etc) so that, at £1.6 million, it represents approximately a quarter (23.5%) of the Authority’s cash spend.

In addition to this, Members have also approved an annual rolling target of £1.5 million generated from external funding, which would be 22% of cash spending.

The MTFS also includes the sums which are required to be paid to the Authority in its role as the local planning authority under the terms of the Section 106 Agreement with York Potash. These sums are very significant. They relate entirely to the impacts of the development itself and are ring-fenced to this alone. If the York Potash project does commence during this Business Plan period, it is anticipated that the bulk of the costs of the facilitation of this work and associated compliance/enforcement of the development will be covered by the Agreement. A separate project plan setting out the activities and resources contained within the Agreement will direct this work.

The MTFS seeks to describe the total resource deployed by the Authority. A very significant part of this resource is volunteer effort, which is planned to increase. This is reflected in the MTFS, which shows rising figures for the total resource deployed by the Authority in addition to its cash spend.

In recognition of the need to resource elements of these ambitious plans, the MTFS allows budget allocations for additional staff costs and discretionary spend. Reserves have been allocated to fund investment in assets and to allow for match funding to secure external grants. The detailed budget figures within the MTFS also include allocations for staff and materials to allow for the growth in volunteer effort.

Table 1 below is a summary of the Medium Term Financial Strategy, which has been developed in response to the consultations undertaken as part of the Business Planning process, and incorporates the ambitious targets in the Income Strategy and the External Fundraising Strategy as well as the allocations of additional resources to deliver the priorities. The presentation of the estimates in this table is consistent with the reporting analysis for National Park Authorities agreed with DEFRA.

The Authority is a member of the North Yorkshire Pension Fund, which is subject to a triennial valuation; the MTFS assumes that there will be no payment for past service deficit but future service contributions will increase from 13.5% to 18%. This is subject to confirmation in 2017.

**Risk to resources**
The increased range of significant income sources has changed the balance of risks. The main ones are seen as follows. Economic downturn could reduce earned income from planning fees, which might or might not be counterbalanced by an increase in domestic tourism induced by a weak pound.

Major grants are competitive, time limited, require effort to secure and rely on good external partnerships. Success is not guaranteed.

There is increasing competition for volunteers and, as the retirement age creeps up, there could be limits to this resource unless the Authority remains an attractive organisation for volunteers.

These risks are mitigated as: the Authority is fortunate in having a clear four-year grant settlement from central government; processes are in place to plan, secure and monitor external funding and earned income; effective partnership work is well established; the Authority has a strong history of successful delivery of projects; and a comprehensive Volunteer Strategy is in place.

The risks in relation to York Potash S106 monies are of a different nature and have been considered separately with the benefit of specialist advice. A work plan for this area, including further risk analysis, is to be developed.

**Maintaining and increasing efficiency**
The Financial Principles contain three which are specifically designed to put internal financial pressure on officers to maintain efficiency. These three principles put a cap on staff costs, limit corporate core costs, and require benchmarking of costs in at least four areas of activity.

The MTFS envisages that the significant areas of outsourcing/collaboration that already exist will remain in place. Further opportunities to share services in one form or another will be taken wherever this can be demonstrated to be cost-effective. Any analysis will take into account the relatively low cost of procuring many services in this part of England (compared with London), the streamlined nature of the Authority’s existing services, and the small size of the organisation (which makes communication easier).

Officers will continue to seek efficiencies by means of maintaining simple internal systems which allow it to make use of global economies of scale by procuring, via national contracts, products which have got a universal application (eg mobile telephony, vehicles, computer software). This approach is facilitated by the fact that the Authority has relatively low levels of acutely sensitive data and generally operates simple systems which require little or no customisation beyond that which can be done with little in-house effort.
Reserves
The Authority’s reserves steadily increased over the last Business Plan period, largely because of a cautious approach to spending taken as a result of the uncertainty relating to future National Park Grant Settlements, but also as a result of success in increasing income generated from external sources. The reserves now total £1.93m. Consideration by officers (including the S151 Officer) and Members has led to the conclusion that the overall level of reserves should be reduced, while retaining a healthy Emergency Reserve.

It is planned to transfer £500k from the general reserves to fund vehicle replacement and the long-discussed electrical, plumbing and re-roofing works on the main offices in Helmsley, which cannot be postponed indefinitely. A separate capital reserve is to be created for work at Sutton Bank following the work of the Member/Officer Working Group. This totals £460k, of which £100k is expected to be spent in 2017/18. Capital investment at Sutton Bank is seen as the best way of simultaneously increasing achievement of Park purposes and generating more income.

The Authority has also committed to match funding the Heritage Lottery Fund Partnership Scheme ‘This Exploited Land of Iron’. A sum of £230k has been earmarked in reserves which will be used during the Business Plan period to fund the scheme, which delivers major advances in the field of industrial heritage.

The table below summarises the proposed allocation of reserves for the Business Plan period.

External funding priorities
The Authority will seek funding for the following areas of work:

1. Sutton Bank re-development.
2. Apprenticeships via the Levy.
3. Rivers: Stage two of Ryevitalise; success of Pearl Mussel work.
4. Marine and coastal issues, especially conservation in the marine element and preferably linking to food, sustainable catches and fishing traditions.
5. Mental health of young people, (preferably working with other National Parks.)
6. Ancient woodland restoration.
7. Prehistoric settlements.
8. Heritage of the alum industry.
10. Landscape and biodiversity improvement of Western Fringe.
11. Dark Border Beauty (moth); Daffodils.
12. Recreational connections along Eastern Fringe.
13. Local food development or/and promotion (especially related to fish and ‘The Capital of Cake’).

All bids will be assessed before being progressed beyond an initial stage. Additional subjects for investigation and new opportunities will be considered against National Park Management Plan targets and policies, chances of success and effort involved. Several bids which are well progressed, such as ones on promotion, are included in the subsequent chapters and do not appear in the list above.

Income and expenditure by department
In the following sections an overview of the key objectives and targets for each theme of work is set out. A summary financial table of expenditure and income is also presented under each heading. These summary financial tables are broken down by Authority department – Conservation, Park Services, Development Management and Corporate Services to fit with the Authority’s financial planning structure.

In practice, the income and expenditure by department will cut across relevant areas of work under other themes. For example, under the Business and Land Management heading, expenditure will be covered by all four departments.
Objectives and targets

Environment

This section describes what the Authority will do to deliver its first statutory purpose, to “conserve and enhance the natural beauty, wildlife and cultural heritage of the National Park.” The first priority will be: work to establish effective wildlife corridors in the National Park – one of this Plan’s three strategic priorities. We will also accelerate the restoration of ancient woodland (PAWS sites) within robust woodland networks.

The National Park’s landscape faces a number of challenges. Climate change poses a particular threat: unpredictable weather and the risk of wild fire and tree and animal diseases are increasing, and significant rainfall events are becoming more frequent. The National Park helps combat climate change through mitigating its effects (eg through woodland creation) and by helping to adapt to its impacts (eg through slowing the flow of flood waters). This is an important part of the wider benefits that the landscape provides to society.

Wildlife has declined significantly over the past 100 years, though this trend has abated and has sometimes been reversed in the last 30 years. For instance the population of the Duke of Burgundy butterfly in the Park has increased significantly through the Dukes and Pearls Project; and the Cornfield Flowers Project has brought rare arable flowers back from the brink. Wading bird numbers are stable or increasing against a national trend. Nevertheless, the erosion of ancient woodland features from sites which have been planted with conifers continues.

Our flagship work on wildlife corridors will help to link the places where animals and plants live so that species can better move around the landscape, allowing them to adapt to changing conditions and to find the things they need to survive. This should make the North York Moors a place where more nature flourishes, where people can experience and enjoy the sight and sound of rare wildlife, and where local people are custodians of this abundance of nature and are proud of what they have helped secure for the future. We need to communicate what we’re trying to achieve in a clear, exciting and engaging way to communities, land managers and others.

The recent change to a new national agri-environment scheme, Countryside Stewardship, has led to a lower uptake of national agri-environment funding, and reduced the area of the National Park managed in line with our purposes for the first time in at least a decade. A significant area of the Park is covered by agri-environment agreements that will end over the next few years, including large areas of moorland. If these areas fail to secure agri-environment funding there could be significant impacts on landscape and wildlife. The UK’s decision to exit the European Union creates additional uncertainty. ‘Brexit’ presents risks and opportunities for the Park’s environment and we must ensure the North York Moors gets the best possible deal from any changes for the environment and those who look after it.

We will deliver two Heritage Lottery Fund Landscape Partnership Schemes. The first of these, This Exploited Land of Iron (TEL), has the North York Moors’ ironstone heritage at its core. TEL will help deliver our priority of removing monuments and listed buildings from risk. The second, Ryevitalise, has recently secured funding and is commencing a two-year development phase before it can move into delivery. Ryevitalise will deliver improvements to the River Rye’s water quality, riverine habitats and cultural heritage. TEL and Ryevitalise will both deliver significant outputs across a range of priorities from the National Park Management Plan.
One significant new area of work for this Business Plan relates to the marine environment, which links with the Park’s significant fishing and maritime heritage. We will secure funds for a significant project in this field.

**Key Objectives and targets**

**E1.** Establish effective wildlife corridors in the National Park. **Target:** Complete improvements in all 132 key wildlife connections by 2019.

**E2.** Initiate the restoration of PAWs woodland. **Target:** 700ha of PAWS woodland initiated by 2021.

**E3.** Implement This Exploited Land of Iron (TEL) with lasting legacy. **Target:** Achieve all HLF output targets and outcomes and maximise benefits.

**E4.** Improve water quality and river habitats for key species on the River Rye and River Esk. **Targets:** Secure stage 2 pass for Ryevitalise and deliver. By 2021 River Esk ready to receive reintroduced juvenile Fresh Water Pearl Mussel (FWPM).

**E5.** Improve the conservation and awareness of the historic environment and cultural heritage of the National Park. **Targets:** 20 monuments and 20 buildings removed from the Heritage at Risk register; 8 new Conservation Area Appraisals and Management Plans for most vulnerable settlements completed.

**E6.** Create new areas of woodland and wood pasture. **Target:** Create 200ha of new woodland or wood pasture by 2021.

**E7.** Lobby on grassland issues, maintain high-quality grassland in the Authority’s care, and restore or create grassland where it is a critical part of a wildlife corridor in the National Park.

**E8.** Propose practical solutions for wildlife, farmers and landscape in the National Park as a result of Brexit and National Policy changes.

**E9.** Increase volunteer involvement with conservation and environmental work through practical tasks and survey/monitoring. **Target:** Increase the number of volunteer days directly associated with conservation work by 5,000 days extra per year by 2021.

**E10.** Secure external funding for work on the marine environment. **Target:** Funding secured by 2020.

**E11.** Maintain landscape character and quality and conserve the distinctiveness of landscape character areas. **Target:** 40 Traditional Boundary Scheme grants each year.

**E12.** Ensure that all data and records are well managed and readily available to inform the Authority’s and partners’ work, and complete appropriate survey and monitoring work.

**E13.** Administer grants to land managers and communities (including traditional boundaries and archaeology). **Target:** see financial principle.
**E14.** Protect and enhance landscape, archaeology and biodiversity through the planning system and manage statutory protection functions through advice and regulation (protected tree work, Hedgerows Regulations and Section 3 maps).

**E15.** Maintain and develop relationships with land managers, partners and other stakeholders working in the Environment sector to deliver Park purposes.

**E16.** Protect and promote the geodiversity of the National Park.

**E17.** Implement agreed efficiencies. **Target:** see actions under E17, page 31.

Understanding and enjoyment

This section describes what the Authority will do to deliver its second statutory purpose, to "promote opportunities for the understanding and enjoyment of the special qualities of the National Park by the public." One strategic priority over the business plan period will continue to be: increase the profile of the North York Moors to achieve the Second Purpose and support the local economy. A new priority for the coming four years will be: inspire young people to understand and experience the North York Moors and be actively involved in its future.

The last Business Plan set a new strategic priority to raise the profile of the area. Through allocating additional resources and working determinedly and closely with tourism businesses and partner agencies, much has been achieved. National media coverage has blossomed, visitor numbers and the tourism economy are steadily rising, and the North York Moors is much better known for what makes it special. Over the coming four years the Authority will continue this focused effort, consolidate its relationship with businesses in the visitor economy, and continue to nurture the North York Moors brand. A new Communications Strategy will better define target audiences and the best means of further increasing profile.

Over the last Business Plan period, our work to engage with young people, principally through our education team, has been highly effective, especially in the light of major reductions in resources. In the last year of the Plan over 14,000 young people were engaged by the Education Service and we are well on course for delivering the Education Strategy. However, there is clear national evidence of a growing disconnect between young people and the natural environment. This was highlighted in the DEFRA 8 Point Plan for National Parks, which urged National Park Authorities to do more in this area. Over the coming five years, we will allocate additional resources in this area, expand delivery of our Education Strategy (which will be reviewed in year three), grow the successful Explorer Club model (which engages with families in a carefully targeted way) and build new initiatives to involve young people practically on the ground. In delivering this work we will also seek to deliver improvements in public health.

As well as these two strategic priorities, there is a huge amount of continuing work which enables the public to explore and enjoy the National Park. The recent surveys of residents and visitors both highlighted the importance to the public of a well-maintained network of public rights of way. In the coming years we will continue to allocate considerable resources to this task, especially through the Ranger and Maintenance Ranger teams, supported by considerable voluntary effort. We will continue to press the Highways Authorities to make a financial contribution to this work and be clear that it does not extend to unsurfaced, unclassified roads (often called green lanes) for which they are responsible. We will continue to focus our efforts on the most popular routes and seek to make public rights of way more accessible to all people.

Key assets in the Authority’s work to promote understanding and enjoyment are its two visitor centres, The Moors National Park Centre at Danby and Sutton Bank National Park Centre. Over recent years they have continued to improve their offer, both in terms of the insight and inspiration they provide regarding the National Park and the breadth and quality of what they offer to visitors. They have also improved their “balance sheet” by reducing costs and by driving up income generation through a variety of sources including retail and concessions. During this Business Plan period we expect to see exciting developments at both centres and an even greater contribution to the MTFS. Firstly, at the Moors National Park Centre, implementation of the ‘This Exploited Land of Iron’ project will see new interpretation displays and interpretive play facilities inside and outside the centre. At Sutton Bank, a new Development Plan will be agreed and work will get underway to significantly extend the centre’s offer, develop exciting new facilities for visitors, and earn more income so that it at least covers its immediate staffing and running costs.
During the last Business Plan, the Authority transformed the way it communicates with many of our audiences. We have moved away from much of our printed communications, focusing on just the most popular and effective such as Moors Messenger and the Out and About Guide. We completely overhauled our website, adapting to new technologies and making it more appropriate to key audiences – visitors and residents – which has delivered a massive increase in traffic. We have developed much more effective use of a variety of social media channels. We also had continued success in engaging with film, television, radio and the press. All this has enabled us to communicate with a far wider and much larger audience. In the coming years we will continue this work. The website will be reviewed and renewed, and we will continue to build our social media presence. We will also change the operation of Village Information Points to find more effective ways to communicate with visitors around the National Park and to provide support to local businesses.

Key Objectives and targets

U1. Inspire more young people to understand and experience the North York Moors and be actively involved in its future. **Targets:** Achieve 18,000 contacts via the Education Service each year; Maintain customer satisfaction with the Education Service at 95% or above; Support 800 school contacts through the targeted transport scheme; 2,000 Volunteer days pa by young people by the end of the Business Plan.

U2. Manage, maintain and improve public rights of way and other priority access routes in the National Park. **Targets:** 80% of public rights of way easy to use; At least 90% user satisfaction with rights of way.

U3. Improve the accessibility to landscapes of the National Park. **Targets:** Cleveland Way is stile-free by end of Business Plan period; Additional 5km of rights of way network each year accessible for disabled people.

U4. Provide high-quality facilities for people visiting the National Park. **Targets:** Maintain number of public toilets available in the National Park; Achieve annual income targets for car parks; At least 60% of visitors surveyed say no improvements are required to facilities (next survey 2021).

U5. Assist local communities in providing key visitor facilities. **Target:** Two extra Village Caretaker Schemes, and four extra community-managed public toilets.

U6. Minimise conflicts between recreational use and land management, conservation and other users.

U7. Engage with people from target areas who are currently less able to visit and enjoy the National Park. **Targets:** Support 2,000 contacts from target areas with the targeted transport scheme; Expand the network of Community Champions to 30; Carry out review of monitoring and targets for outreach work in 2017 (Access and Recreation Business Forum).

U8. Identify key audiences and messages and deliver communications priorities. **Target:** Commission, develop and deliver a Communications Strategy by April 2018.

U9. Maintain, review and improve website effectiveness as a key communication tool (in line with Communications Strategy). **Target:** New website developed by April 2019.

U10. Continue production of a limited range of high-quality, key publications.

U11. Provide on-site visitor information at key locations.

U12. Provide a communications service across the Authority.

U13. Continue to provide, develop and improve excellent National Park Visitor Centres. **Targets:** Meet Medium Term Financial Strategy income targets at Visitor Centres; Maintain at least 90% user satisfaction with understanding and awareness services.

U15. Deliver engagement and interpretation elements of This Exploited Land of Iron project. **Target:** Meet all relevant TEL project targets.

U15. More people will be aware of and associate with positive images with the National Park. **Target:** Maintain at least current levels of visitor and regional awareness (review targets following production of the Communications Strategy).

U16. Provide more opportunities for volunteers to contribute to all aspects of delivery of the National Park Authority’s second purpose. **Target:** 2,500 additional volunteer days across delivery of second purpose (excluding youth volunteering).
Business and land management

This area of the Business Plan contains the actions that the Authority will take via its purposes and planning functions to support local businesses and contribute towards improving the economy of the National Park. This reflects the duty “to seek to foster socio-economic interest of local communities”, as set out in the 1995 Environment Act.

Whilst the Authority has previously maintained a role in supporting the local economy, the current economic climate means that this area of the Authority’s work is of more significance than it has been in the past. In 2011 it became apparent from the Authority’s own research that visitor numbers to the North York Moors were in decline, that the profile of the National Park was low and that the local economy was suffering as a result. The last Business Plan set a new strategic priority to raise the profile of the area and seek to turn this situation around and the Authority’s own aspirations in this area have been consistently met or exceeded. Over the coming five years the Authority will continue this focused effort, consolidate its relationship with businesses in the visitor economy and continue to nurture the North York Moors brand. A new Communications Strategy, will set out the way forward for much of this work. Signage to the Park and within it will be improved.

The Authority’s role in supporting the economy is largely through liaison and partnerships, acknowledging that other organisations, land managers and the private sector play a more active role in operating businesses. The Authority’s role also seeks to ensure that economic and business activity is undertaken in a way which does not undermine, and where possible furthers, the statutory National Park purposes. Three key areas of the Authority’s work that relate to this are developing the new Local Plan, working to increase the area of the Park managed under agri-environment schemes, and promoting better broadband and mobile connections.

Key challenges which the Local Plan will need to address include the continuing decline in the number of banks, post offices, bus services, village shops, pubs and even the last remaining public phone boxes. Given the extent of past reductions in these services we will press hard for the vital social and economic communications provided by broadband and mobile telephony to be finally extended to reach all residents in the Park. Our planning policies will continue to support the rollout of this important infrastructure.

Key Objectives and targets

B1. Support the agriculture sector to become more resilient and capable of adapting to changing economic circumstances whilst contributing to the National Park’s special qualities.

B2. Help to promote and support local businesses.

B4. Increase the profile of the North York Moors to achieve the Second Purpose and support the local economy. Targets: Maintain visitor awareness at least current levels (targets to be reviewed following completion of Communications Strategy); Continued growth of the visitor economy.
Communities

This section sets out what we aim to do over the next four years to support National Park communities to thrive – both socially and economically. This includes delivering our statutory role as the Local Planning Authority to encourage sustainable development within the National Park.

The area of work that attracts most public attention is the Development Management service. Planning by its nature deals with contentious issues; however we aim to provide a professional, customer-focused service set in the context of National Park purposes. The Authority will continue to support development that protects and enhances the National Park’s landscape and built heritage.

The drive for growth and reform of the planning system, which followed the financial crash of 2008, continues with more permitted development rights and national policies which focus on growth, in particular increased housing development. Many of these changes lie uneasily with the detail and conservation focus of National Park planning and will inevitably impact on the special qualities of the Park and reduce the opportunity for public involvement. The Authority will nevertheless provide a planning service that protects the National Park from inappropriate development as far as possible, whilst supporting proposals that help deliver National Park purposes and bring about social and economic benefits for its communities. We will also work to ensure that government policies and decisions and, in particular, any changes as a result of Brexit, fully recognise the status of protected landscapes and the importance of the role that planning can achieve in their protection.

We are committed to providing opportunities for local people to be involved in the preparation of key policies for the National Park. This will be especially important over the next two years as the Authority adopts a new Local Plan. Individuals, communities, businesses, landowners and local interest groups will be engaged in development of this important document, which will provide the framework for planning decisions in the National Park for the next 15-20 years. This is the key planning activity that we will undertake during the first half of the Business Plan period, and its importance in seeking to support the delivery of the essential development needs of our rural communities cannot be overstated.

Key challenges that the Local Plan will need to address include the decline in the number of banks, post offices, village shops, pubs and even the last remaining public phone boxes (see previous section). Housing provision will also present a planning challenge, with key national changes arising from the Housing and Planning Act 2016 that shift the focus of national funding and policies potentially away from social rented housing. The Local Plan will seek to ensure the Authority’s focus will continue to be to approve housing essentially to meet the needs of the National Park communities.

In 2015 we set out a new strategy to extend the range of volunteering opportunities across all aspects of our work and build a better working relationship between volunteers and paid staff. We have ambitious targets to deliver this strategy and offer more opportunities for volunteering over this Business Plan period. We are particularly keen to work with local communities and support them to deliver more through community-led projects.

The Ranger Service remains in close contact with local communities and, through operation of grant schemes, supports them in maintaining the village environment and key visitor facilities such as toilets (see Understanding section). In the coming years we will seek to extend this work to more communities.

Conservation of our unique cultural heritage is one of the purposes of National Park designation. We want to support local communities to develop projects and programmes that are rooted in the local distinctiveness of the North York Moors, and early in the Plan period we will be working on a trailblazing scheme for apprenticeships in building conservation work.
Key Objectives and targets

C1. Deliver a customer-focused Development Management service that supports economic and community development whilst helping to protect and enhance the special qualities of the National Park. **Targets:** 80% of planning applications determined within 8 weeks; at least 80% of applicants satisfied with the Development Management service.

C2. Complete the Joint Minerals and Waste Local Plan, through a public examination to final adoption, to ensure a robust planning framework is in place to assess minerals development, including conventional and shale gas proposals, in or affecting the setting of the National Park. **Target:** New Joint Plan adopted by November 2017.

C3. Prepare and adopt a new Local Plan to provide a clear framework for planning decisions in the National Park. **Target:** New Local Plan adopted by November 2018.

C4. Provide a high quality service for the implementation of the Sirius Minerals Polyhalite Mine and Tunnel (MTS) Planning Approval/ Deal with new or amended application if required. (See separate Plan). **Target:** S106 funded work successfully implemented; construction programme for mine and MTS is successful in terms of mitigation to ensure any adverse impacts on the National Park and its communities are minimised.

C5. Deliver the volunteer strategy, developing a ‘one team approach’ and embedding volunteering in all areas of the Authority’s work. **Targets:** 23,000 Volunteer days each year by 2021 (including 3,000 via TEL project); Volunteer Satisfaction survey to be carried out in 2017, which will set a baseline and enable agreement of annual targets for volunteer satisfaction for 2018 – 2020.

C6. Enable communities to influence the delivery of services and decisions affecting the National Park.

C7. Support local communities to be more sustainable by supporting the provision of new facilities and resisting the loss of important services.

C8. Ensure the Authority has a robust framework of planning policy documents and processes in place to help meet local housing needs, and ensure new development protects and enhances the National Park’s landscape and built heritage.

C9. Work jointly with others to strengthen national protection for National Parks, including in relation to the National Planning Policy Framework and environmental assessment.

Corporate

Corporate Services covers a range of specialised activities that support front-line delivery. These high-quality, low-cost services are currently pegged at 5% of the Authority’s gross cost in our financial principles. Work will continue in the context of a significantly smaller corporate team, with part of the solution to improving services and driving down costs being in a more effective use of volunteers’ skills.

In relation to IT we will continue to use ‘off the shelf’ packages in innovative ways, with the aim of meeting both public and internal users’ needs, providing a resilient, supported and compliant IT infrastructure whilst maintaining low costs.

As volunteers play an increasingly important role, we will need a structured approach to ensure that paid and unpaid staff can develop skills and feel properly integrated in the work of the Authority. Our apprenticeships have received national attention and we will lead on the DEFRA 8 Point Plan targets in relation to the training of young people.

The Authority is proud of its ‘old fashioned’ approach to personally answering every telephone call, seeing every visitor to its buildings, and being thorough and diligent in responding to correspondence. This will continue, but our Customer Service standards need refreshing to reflect the changed way in which our customers prefer to interact with us.

Partnership arrangements with Scarborough Borough Council and North Yorkshire County Council (NYCC) are in place. The legal contract will be retendered and work will continue to fully realise the cost savings and service improvements (streamlining processes and better budget support provision) envisaged in the Finance Collaboration agreement. Bilateral agreements will be agreed with partners to secure appropriate contributions to the National Park Management Plan.

Members will continue to be well supported to enable them to play an increasingly diverse and effective role in the organisation. Committee reports and agendas will continue to be produced in electronic form only, reducing costs and improving efficiency.

Various methods to improve standards will be employed, including external verification through Customer Service Excellence; collaboration with NYCC to deliver financial services; and consultation with residents and users, including via the Disability Advisory Group. The Health and Safety Service Level Agreement will also be important, particularly as the extent to which volunteers are used is grown. A review of how we manage and review performance will also be completed.

External funding generation is critical to the delivery of this Business Plan. An annual average target of £1.5 million has been agreed, which will comprise a range of larger and smaller funding bids, targeted at the Authority’s priority areas. We will continue with a simple process to ‘authorise’ staff to spend time on bids and keep Directors and Members up to date with current and potential future funding projections.

Open, effective governance of the Authority will continue, including continued promotion and revisions of our Ethical Framework, Code of Conduct, Standing Orders and Financial Regulations.
Key Objectives and targets

CR1. Provide inspiring strategic People Management support to the Authority and ensure that people are supported to enable them to deliver services in a way that makes the most of their skills. **Targets:** 7% staff turnover, a maximum of 4 days/year sickness absence and incremental improvements in outcomes to staff satisfaction survey.

CR2. Improved delivery of excellent customer service across all of the Authority’s functions. **Target:** To retain Customer Services Excellence at or beyond current high levels of achievement.

CR3. Deliver resilient, supported and compliant IT services based on needs of users/customers. **Target:** Key systems available 99% of working time.

CR4. Ensure that Health and Safety is appropriately controlled and managed across all activities, with all staff, volunteers and Members properly engaged in working safely. **Target:** Use external assessment to help develop/deliver annual health and safety action plans; incremental improvements in outcomes to health and safety attitude surveys.

CR5. Ensure the Authority has timely access to high-quality financial data to facilitate effective decision making at all levels. **Target:** Review at least once in Business Plan period to seek views from users.

CR6. Support the securing of £1.5m of external funding annually across the Authority. **Target:** Achievement of £1.5 million target annually during Business Plan period.

CR7. Ensure effective/transparent corporate governance and provide high-quality support to the Authority’s Committees and Members. **Target:** No justified complaints regarding member conduct.

CR8. Ensure that the costs of Corporate Services remain at 5% or less of the Authority’s gross costs. **Target:** Report on achievement against this financial principle annually.

CR9. Maximise the effective use and income generating potential of the Authority’s property portfolio. **Target:** Development and delivery of the actions contained in revised Property Management Strategy.

CR10. Maintain excellent working relationships with key partner organisations to assist in the delivery of the National Park Management Plan. **Target:** Corporate Services to lead an assessment on the effectiveness of partnership arrangements.

</tr>
<tr>
<td>Identify cost-effective opportunities for increased renewable energy utilisation in-line with maintenance or modification of Authority sites. Priority sites will be: Sutton Bank (incorporating new developments), Authority-managed public facilities and Authority buildings.</td>
<td>By end of April 2018</td>
<td>Corp Services</td>
</tr>
</tbody>
</table>

### CR10: Maintain excellent working relationships with key partner organisations to assist in the delivery of the National Park Management Plan (NPMP)

| Work with partner organisations in different ways to ensure that the full scope of National Park Management Plan targets is met. The list of partners should be wide and will include local authorities, agencies, non-governmental organisations, tourism bodies, interest groups etc. | Ongoing | All |
| Ensure bi-lateral arrangements are in place to secure maximum delivery of NPMP, at least with Natural England, Forestry Commission, Welcome to Yorkshire, Historic England. | Corporate Services |
Appendix 1. National Park Purposes, Mission and Vision

All English National Park Authorities have two statutory purposes which describe the work in which they should be involved. They are:

“To conserve and enhance the natural beauty, wildlife and cultural heritage”
“To promote opportunities for the understanding and enjoyment of the special qualities of the area by the public”

The Authorities also have a number of statutory duties placed on them, including a duty under the 1995 Environment Act “to seek to foster socio-economic interests of local communities” whilst pursuing the purposes. There are a number of other statutory duties such as requirements under the Town and Country Planning Acts and financial efficiency and governance obligations.

Mission

The Authority has adopted a mission statement based on the purposes:

“To sustain the landscape and life of the North York Moors for both present and future generations to enjoy”

Vision

This Authority has adopted a vision for the place it cares for which, although developed for the 1998 National Park Management Plan, and subject to a few minor additions, remains relevant as a long-term aspiration for the area and is consistent with the 2030 Vision within the National Park Circular.

This vision for the future is one which the activities of the Authority and other organisations working in the National Park can all contribute to.

Core Values

In 2010 the Authority agreed a set of ‘Core Values’ which encapsulate the culture of the organisation and the way in which it works.

These values represent the attitudes, beliefs and behaviours of the NYMNPA family.

We aspire to:
- Champion the qualities that make the North York Moors a unique and special place.
- Promote opportunities for everyone to get involved.
- Treat everyone with respect.
- Have a personal approach to delivering services.
- Always try to improve what we do.
- Use money and other resources carefully.
- Help our communities flourish.
- Respect the best of tradition whilst recognising the need for innovation.
- Contribute positively to sustaining the global environment.
- Do what we promise.

### National Park and National Park Authority SWOT

<table>
<thead>
<tr>
<th>Strengths</th>
<th>Weaknesses</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Strong positive culture among Members volunteers and staff.</td>
<td>2. Historically weak and confused branding for the area.</td>
</tr>
<tr>
<td>3. Well regarded by public/customers.</td>
<td>3. Poor signage and sense of arrival.</td>
</tr>
<tr>
<td>4. Good brand building so far.</td>
<td>4. Lack of coastal and marine presence.</td>
</tr>
<tr>
<td>5. Our enthusiasm for the landscape – staff/members &amp; users of NP.</td>
<td>5. Continued contraction in resources of central and local government partners.</td>
</tr>
<tr>
<td>7. Practical approach, able to deliver and trusted relationships to make happen.</td>
<td>7. Reduced accessibility without a car.</td>
</tr>
<tr>
<td>9. Apprenticeship programme.</td>
<td>9. Economic pressures cause some bigger authorities to see NP as a hindrance.</td>
</tr>
<tr>
<td>10. Many enthusiastic Volunteers of all kinds.</td>
<td>10. Difficulty saying ‘no’ to things.</td>
</tr>
<tr>
<td>11. 4 year settlement.</td>
<td>11. Continuing de-stabilisation of the planning system and</td>

<table>
<thead>
<tr>
<th>Opportunities</th>
<th>Threats</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Wonderfully diverse landscape and seascape.</td>
<td>1. Less £ - NPG.</td>
</tr>
<tr>
<td>2. Interact with special qualities through new and varied means.</td>
<td>2. Reduced partner capacity.</td>
</tr>
<tr>
<td>3. Build brand – NYM &amp; NP for us and others to use.</td>
<td>3. Climate change and globalisation (together or alone) leading to fire, flood and plant and animal diseases.</td>
</tr>
<tr>
<td>4. Vast public support.</td>
<td>4. LG reorganisation/devolution.</td>
</tr>
<tr>
<td>5. Big National Park infrastructure projects!</td>
<td>5. Major mineral workload diverts from other priorities.</td>
</tr>
<tr>
<td>6. Do more business with our customers in new ways.</td>
<td>6. Competing trusts and wider partnerships/commercial opportunities.</td>
</tr>
<tr>
<td>7. Learning from other Parks worldwide.</td>
<td>7. Loss of agri-environment funding or environmental protection as EU mechanisms are replaced.</td>
</tr>
<tr>
<td>9. Assist the Trust, bequests, giving, commercial.</td>
<td>9. Major developments in or near Park harm perception of the area.</td>
</tr>
<tr>
<td>10. Use of 106 Agreements.</td>
<td>10. Competition for ageing volunteers.</td>
</tr>
<tr>
<td>11. Increase contact with young people: youth volunteers/youth member.</td>
<td>11. Complacency.</td>
</tr>
<tr>
<td>13. Restore ancient woodland and create wildlife corridors.</td>
<td></td>
</tr>
</tbody>
</table>
